Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

The restriction requirement under 35 USC 121 and applicants' traversal thereof have been carefully considered. Applicants assert that examination of all the groups would not amount to an undue burden since they have common classification. As pointed out in the original requirement, even though they have common classification the search and examination thereof require divergent considerations even if the search of the patents may overlap. While there are similarities in the processes, such as the starting material, the actual processes require still further distinct reactants and reaction conditions. They are not the same processes and are patentably distinct. Accordingly, the requirement is deemed proper, repeated and made final.

Claims 2-17 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 103¹

Claims 1 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Inanaga (EP-103887). The reference generically teaches the claimed compounds, note

¹ The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

the necessary octahydrobinaphthol intermediates to the compounds of formula 3 of Inanaga wherein R₅ and R₆ may be hydrogen and either R₇ or R₈ may be hydrogen or alkyl (note the discussion in paragraph [0013]). The reference does not specifically exemplify the instant compound. However, the generic teaching indicates to one of ordinary skill in the art that species falling within the generic disclosure, including the instantly claimed compounds would possess the prior art use. It is well within the skill of the artisan to select among the alternatives of the reference to afford compounds possessing the prior art use, *In re Lemin*, 141 USPQ 814.
